

Citizen Science & Observations

Weather & Society, Session 1

What would you highlight from today's session?

Which are the research gaps in Citizen science and observations?

test

Data quality and verification. How to validate data from social media

combination of unsolicited and solicited data in an open science mode

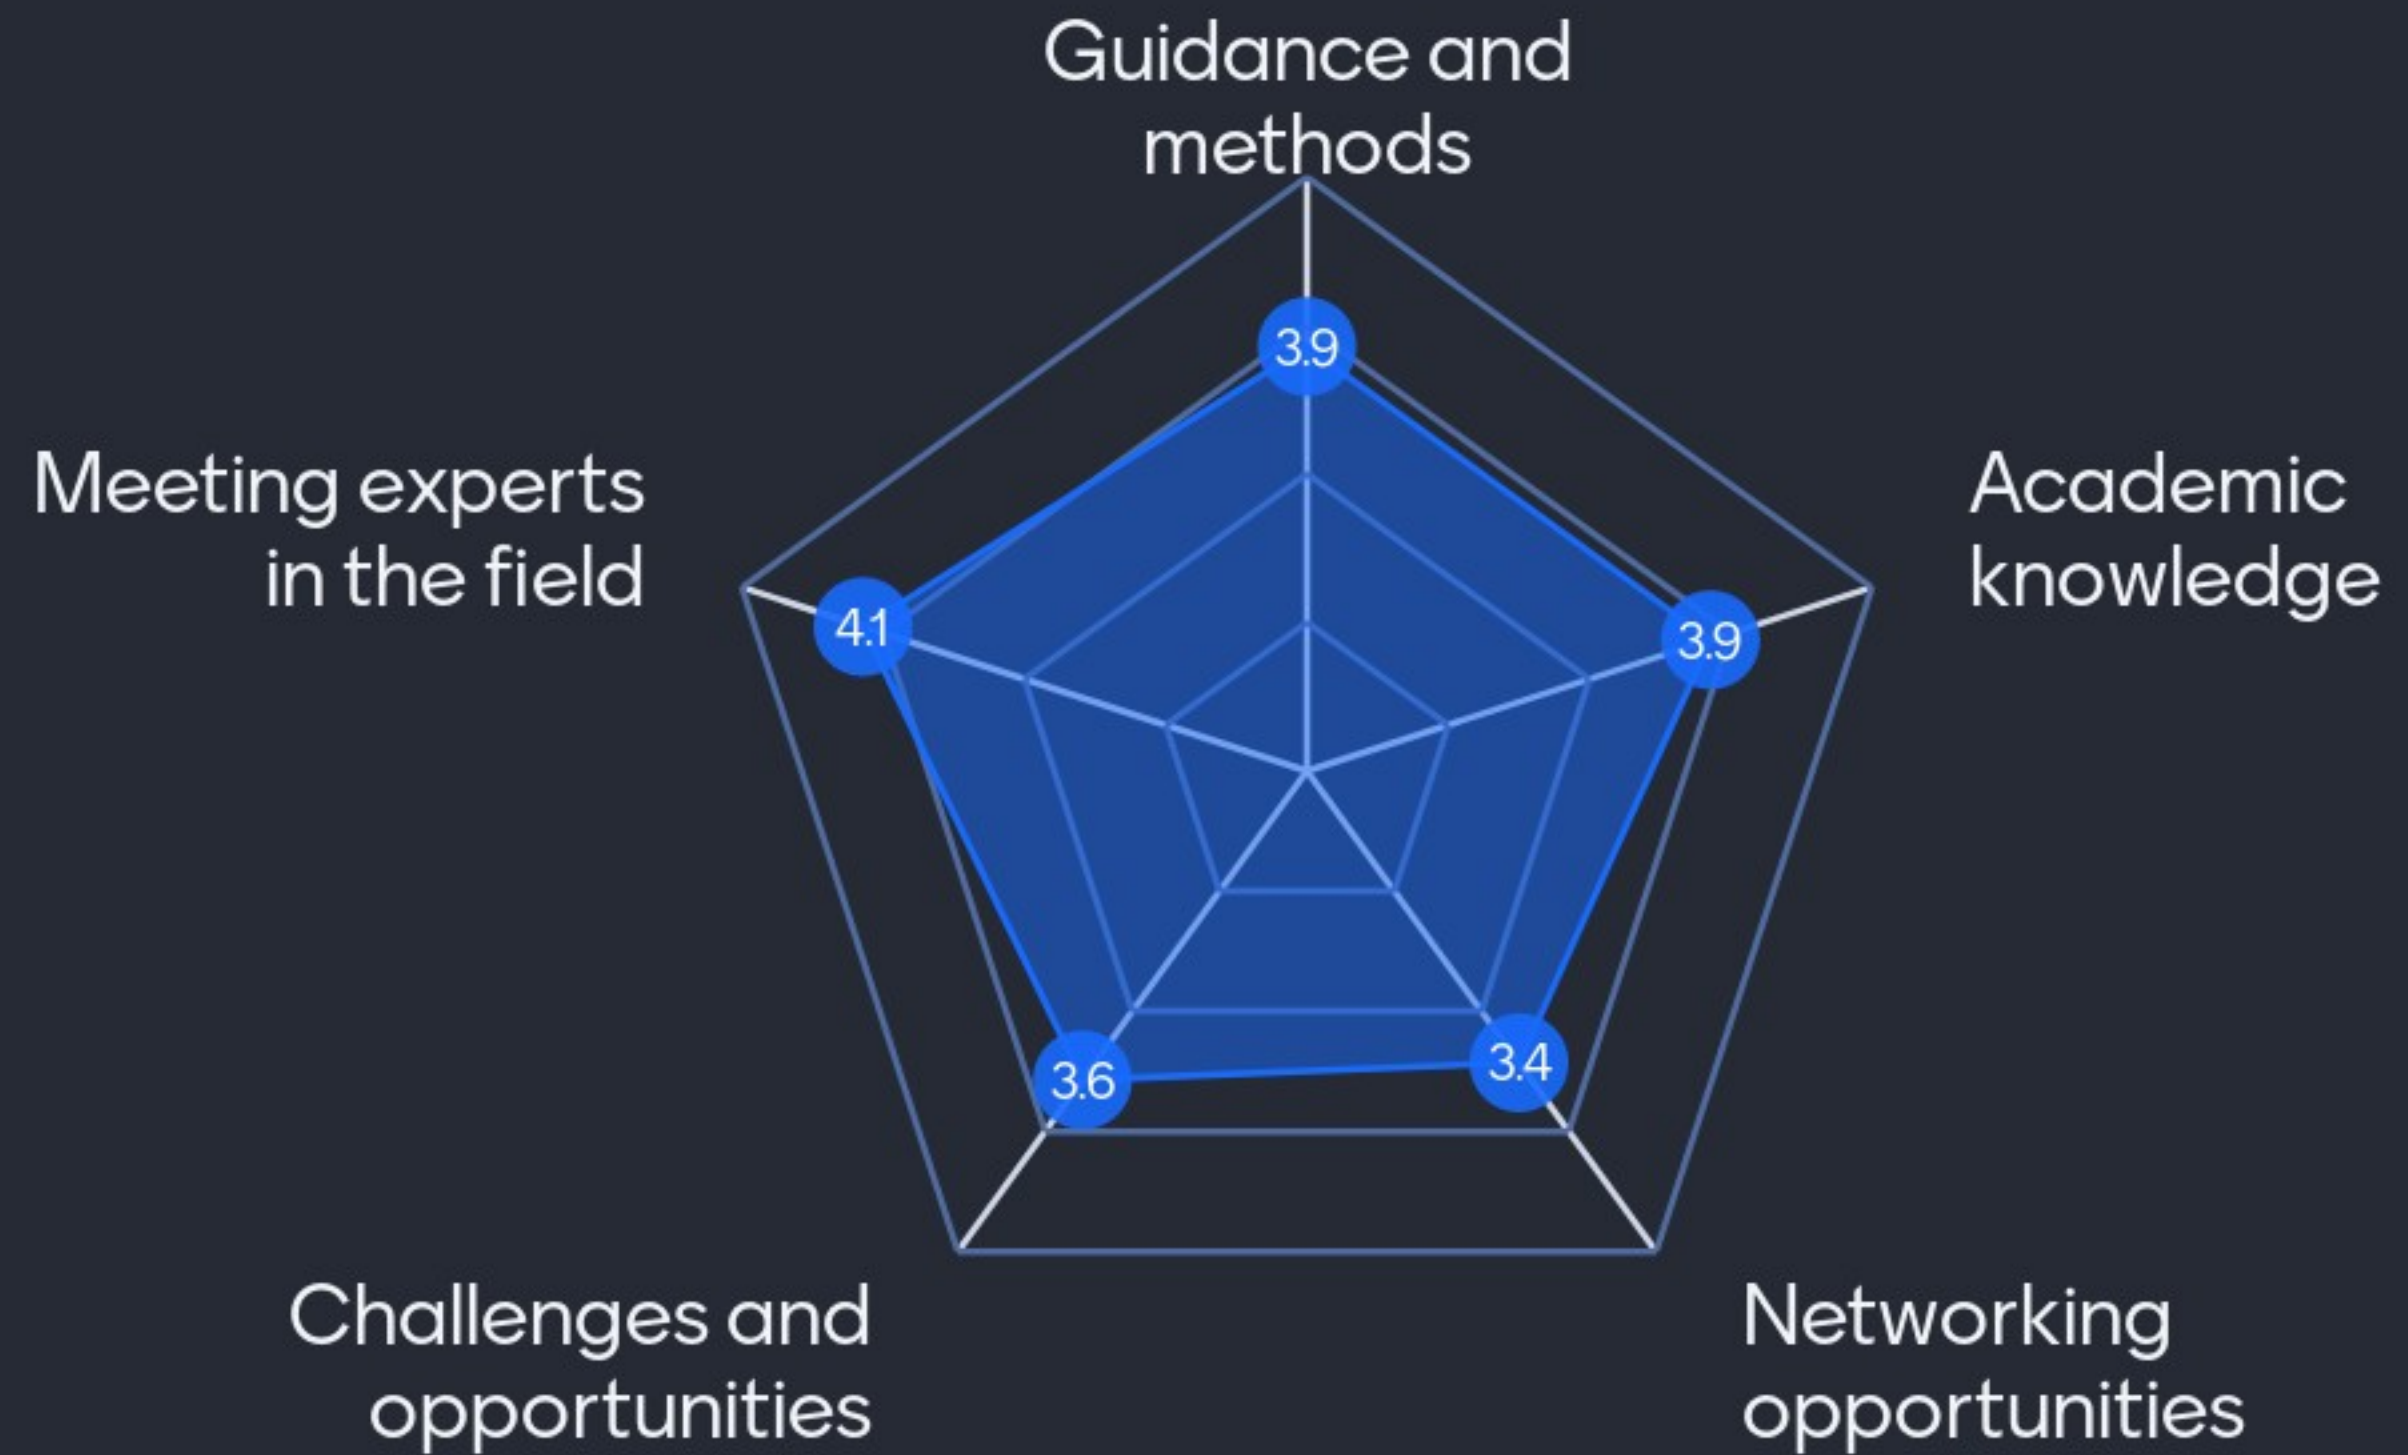

Understanding the added value of citizen science to weather services and the implementation of citizen science in the warning production chain and for verification.

Communication and information gap on the local and regional level

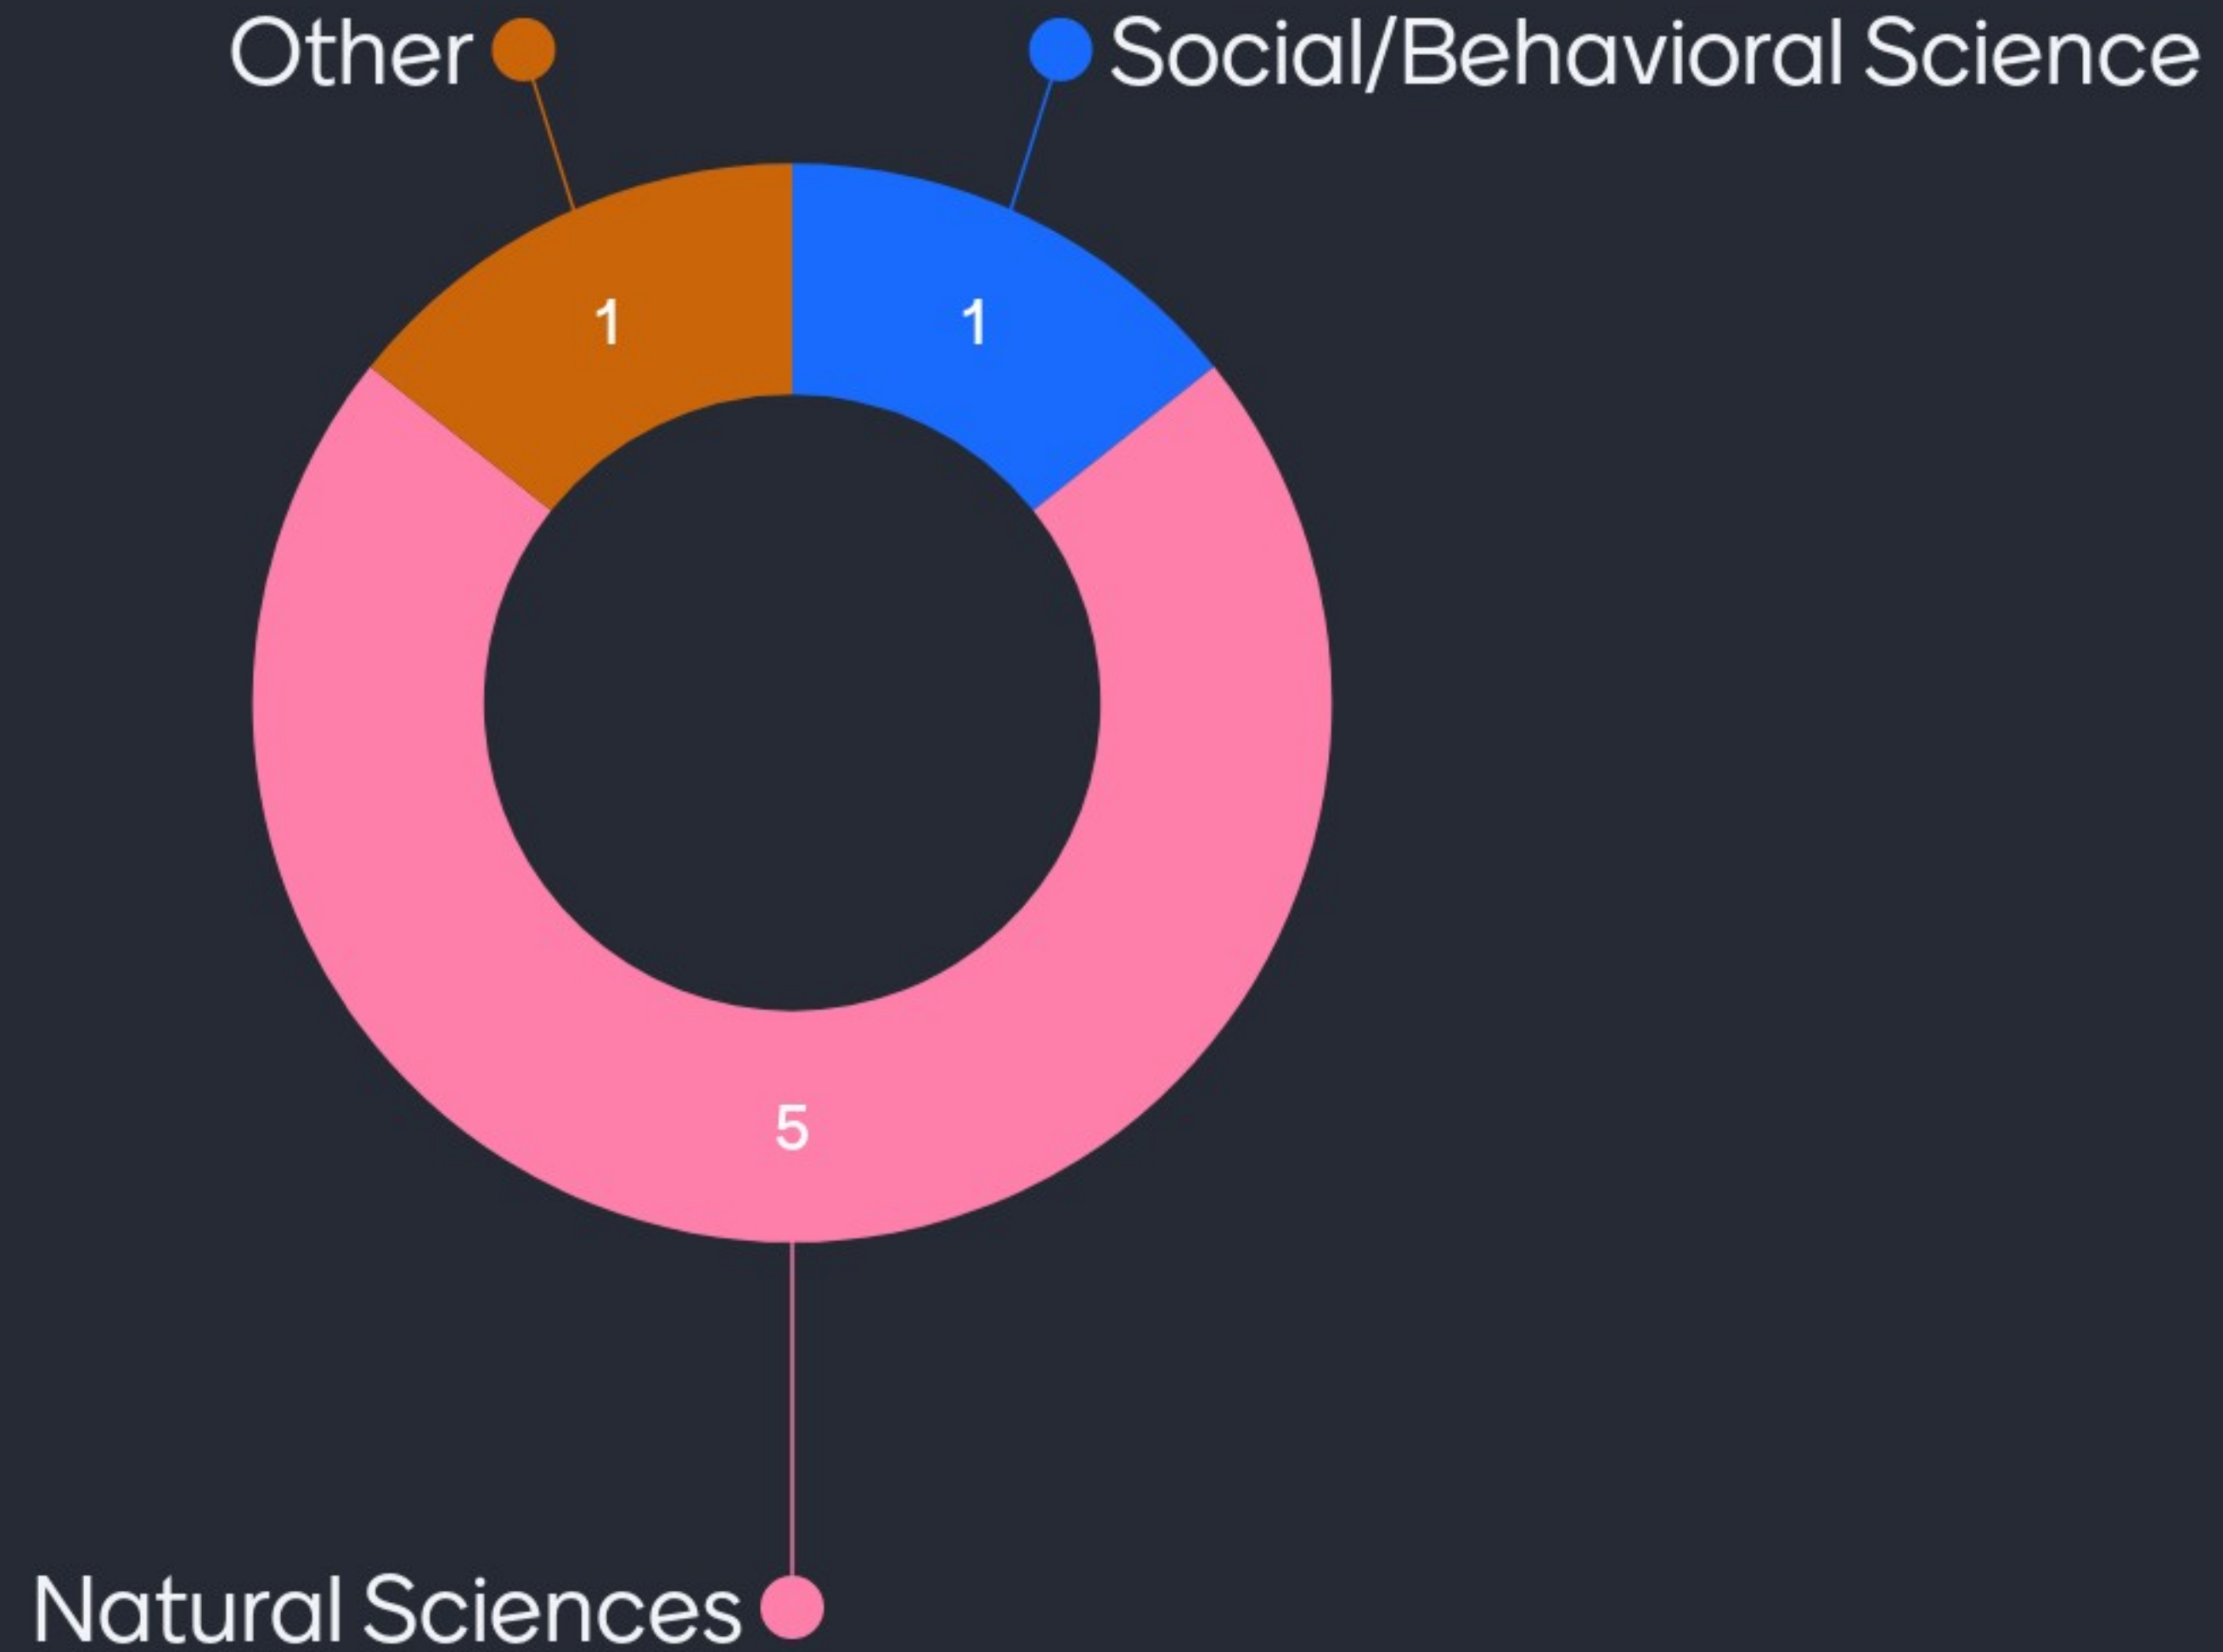

How to record impacts in a consistent way to allow the information to be used quantitatively.

bridging social sensing and citizen science

Which were your motivations to join this session?

What is your background?

Let us know if there is anything else you want to share with us

None for now.

Thank you.

great work everyone!
