Coming up

- My background
- Why social science
- Journey so far
- Topics
- Next steps

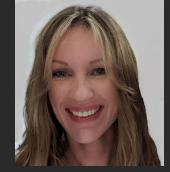

Met Office Social Science

Background

Helen Roberts

- 19 years in weather 17 years as an Operational Meteorologist:
 military aviation transport retail commercial media
- Current role: Product Futures, Markets
- Studying for an MSc in Psychology

Met Office Social Science

Why?

www.metoffice.gov.uk

© Crown Copyright 2022, MetOffice

Met Office incorporates a wealth of expertise and knowledge, particularly in terms of natural, physical and data sciences.

Growing recognition that social science is equally as important.

When forecasting weather, we are actually predicting 'the social consequences of the atmosphere' (Daipha, 2015) - the sensable weather.

Met Office Social Science

Journey so far...

Kayleigh Hutcheon

Operational Meteorologist cognition including decision-making processes

Contextual (emotional) biases when decision-making - (forensic science research)

- Handover process, model changes
- Severity and anchoring bias UCL collaboration
- Expertise how to maximise
- Positivism v Interpretivism scientist v detective empirical v intuition system 1 v system 2
- Streamline decision-making multiple focuses chunk schedule
- Added value of the human meteorologist
- Visualisation preferences (Informatics Lab eye tracking)

 $\overline{}$

Contextual (emotional) biases when decision-making

Example of an unambiguous match (left), an unambiguous non-match (centre) and an ambiguous pair (right) Source: Osborne and Zajac, 2016, Imperfect Match

Operational Meteorologist cognition including decision-making processes

- Contextual (emotional) biases when decision-making (forensic science research)
- Handover process, model changes
- Severity and anchoring bias UCL collaboration
- Expertise how to maximise
- Positivism v Interpretivism scientist v detective empirical v intuition system 1 v system 2

Streamline decision-making – multiple focuses – chunk schedule

- Added value of the human meteorologist
- Visualisation preferences (Informatics Lab eye tracking)

Communication - customer decisions and behaviour

- Probabilistic v deterministic
- Aleatory v epistemological uncertainty
- Text v visuals
- Warnings colours, matrix, text, lead time
- Weather symbols
- Impact and advice

- Storm names
- Recent experience bias
- 'Storylines'
- Segmenting publics
- Positive messaging

Staff well-being

- Positive Psychology
- Shift-work seminar series
- Mental health

- Leadership
- Culture
- Bullying and harassment

Met Office Social Science

Next steps

www.metoffice.gov.uk

© Crown Copyright 2022, MetOffice

- Continue to develop the Met Office Social Science Community of Practice
- Source interesting and relevant speakers internal and external
- LinkedIn communications
- Finish MSc and write a full report
- Integrate and embed social and natural sciences evidenced by pandemic

- Social science as important as physical and data sciences
- Coordinate social science work in Met Office
 - Social Science Community of Practice
- Embed social science into ways of working
 - Expertise, cognition, communication, decision-making, behaviour
- Dedicated social science resource
